

## ROLCO CASTOR OIL

ROLCO'S CASTOR OIL IS A PREMIUM INDUSTRIAL GRADE, NON-DRYING VEGETABLE OIL. IT CAN BE ADDED SPARINGLY TO ROLCO'S GOLD SIZE VARNISHES TO EXTEND TACK AND DRYING TIMES.

ADDING ONE (1) OUNCE PER QUART WILL DOUBLE THE NORMAL TACK AND DRY TIMES. DIFFERENCES IN STANDARD TEST TEMPERATURE OF 70 DEGREES FAHRENHEIT AND A HUMIDITY OF 50 PER CENT WILL AFFECT THE TACK AND DRYING TIMES. THE HIGHER THE TEMPERATURE AND HUMIDITY THE SHORTER THE TACK AND DRY TIMES. CONVERSELY THE LOWER THE TEMPERATURE AND HUMIDITY THESE TIMES WILL BE LENGTHENED. NORMALLY A TEMPERATURE OR HUMIDITY OF PLUS OR MINUS 10 DEGREES WILL NOT AFFECT THESE TIMES APPRECIABLY.
